

The Four Winds

National Weather Service Employees Organization

NWSEO Announces a New & Improved Website

(July 1, 2020) NWSEO is thrilled to announce a preview and testing of our redesigned website. Our website is an important resource for employees, media contacts, politicians, and the public. The improved NWSEO.org has been under construction for some time and has been a challenging effort due to the massive content of our existing website, which contains over 1,000 pages of important information. [Please access the new website HERE*](#).

Several changes were made to improve the presentation and user experience of our website, to include:

- Mobile/tablet device friendly site
- Search feature to make it easier to locate important information
- Subscription service for website updates
- Improved NWSEO store
- Password protected section for NWSEO Officers

We value your opinion and feedback on the new website. Please click on this [LINK](#) to complete a quick survey. The survey will be available through July 15, 2020.

NWSEO wishes to extend special thanks to those who have contributed time, input and great effort to the new website especially *Roger Edwards*, Storm Prediction Center Lead Forecaster and NWSEO member since 1999. The photographs you see on our website were generously provided by Roger. You can view more of his great photographs at <https://skypix.photography/>.

Our existing website (www.nwseo.org) will remain operational until our new site is ready for full release.

*Download speed may vary depending on the number of viewers at one time.

-NWSEO-

No one cares more for National Oceanographic and Atmospheric Administration (NOAA) employees than NOAA employees.

No one works harder for NOAA employees than NOAA employees.

We are NOAA employees. We are NWSEO.

NWSEO proudly represents more NOAA employees than any other Union. NWSEO serves bargaining unit employees of the National Weather Service, NESDIS Office of Satellite and Product Operations, Office of General Counsel, Aircraft Operations Center, and Atlantic Oceanographic and Meteorological Laboratory.
